How much could your business benefit from digital signage? Healthcare, Education, Government, and restaurants save time and make money with digital signage.

Circa 1982

There's been a lot of changes in the Treasure Valley, and Idaho in the last 34 years but one thing has stayed the same, AUDIO ELECTRONICS in Meridian, smack dab in the middle of everything and just a phone call away. Ken and Craig Thomson were here then and they're here now. The staff at AUDIO ELECTRONICS are committed to treating customers as friends, the same as they expect to be treated by those they do business with.

Why Choose AEI?

- 34 years serving all of Idaho and Eastern Oregon.
- We answer the phone personally, no voice mail!
- We finish each job on time and on budget.
- We still service "the old stuff". After all, we most likely installed it since we were here way back then. We won't recommend replacement unless it really can't be fixed
- Our technicians have up to date certificates for all the new technologies that we provide.
- We service all makes and manufacturers with prompt and courteous technicians.
- We listen, because no 2 projects are alike.
- AEI Means Quality.
- We're proud of our work but you won't have to pay twice as much because of it.
- Design, installation, and servicing of any low voltage system is our specialty.
- At AEI we have an in-house CAD design team to produce drawings needed for installation and maintenance of your individual specialized system.

Mission Statement

We will strive to be the most honest and ethical trade partner of choice. We will foster a work environment that encourages new ideas, new innovations and growth. We will maintain a team dedicated to providing exceptional customer service. We will maintain the highest levels of professionalism, integrity and fairness in our relationships with our suppliers, contractors, professional associations, and customers

We strive to exceed our customers expectations in every way.

It's a Matter of Life & Death

Fire alarms are not a luxury, they're a required necessity in most buildings and new construction. Once installed the codes require at least annual testing (more often with healthcare and some other facilities). Testing and monitoring are thorough, economical as well as accurate when you contract with Audio Electronics, Inc. State of the Art Fire Alarm and Mass Notification Systems, Testing and Monitoring. Don't wait for the Fire Marshall. **KEEP CURRENT!**

School Security

Nothing, we mean nothing is more important than your children's safety at school. Audio Electronics provides the total safety solution by Telcor. Total school lock-down at the touch of a button or via mobile device.

Secure Video Surveillance

Security is more important than ever. Make sure that you are in charge of the decision about who goes past the reception area or into your building is another specialty at AEI.

Senior Concerns

Keeping track of your residents, especially in the memory units has become of critical concern to both facility owners and family members. Your loved ones are safe wherever AEI does business.

Healthcare

From nurse station communications to access, safety and surveillance, most facilities already rely on Audio Electronics, Inc.
